OVERVIEW

- Here are some key features that a shopping application typically includes:

- Search and Browse: The application provides users with a search bar and category filters to find products or services they are looking for. Users can also browse through the products based on various categories such as price, brand, or popularity.

- Product Details: The application displays detailed product information such as images, descriptions, features, specifications, and reviews to help users make an informed purchase decision.

- Shopping Cart: Users can add multiple products to their shopping cart and remove them if necessary. The cart shows the total price, including taxes and shipping fees, and allows users to apply discounts or promo codes.

PROCESS

Planning Features : Task creation As discussed during the meeting, the task was created. Task assignment Each member of the group is assigned a task. Priority setting – Prioritized tasks during each phase of the project release. The due date of each phase release has been tracked and worked accordingly. All phases of the project have been monitored. Notifications The lead of the group has notified each member to work on the project and finish it in due course.

FLOW

CHALLENGES FACED

Running an A-Z shopping website involves challenges such as ensuring a smooth user experience, managing inventory and logistics, maintaining secure payment systems, providing excellent customer service,
staying ahead of competitors, and dealing with technical maintenance and data security. Success requires strategic planning, efficient processes, and a customer-centric approach.

FUTURE DEVELOPMENT

Enhanced Mobile Experience: Prioritize mobile optimization for seamless browsing and purchasing on smartphones and tablets.

AI-Powered Customer Support: Implement AI chatbots to provide instant assistance and streamline customer inquiries.

Expansion of Payment Options: Introduce diverse payment methods like digital wallets and installment plans to cater to varied customer preferences.

Sustainable Practices: Incorporate eco-friendly initiatives such as sustainable packaging and promoting environmentally-conscious products.

Global Reach: Strategize international expansion by localizing the website, optimizing logistics, and tapping into new markets for growth.
